

PROJECT UPDATE

CONSTRUCTION UPDATES

As we move out of winter and into spring, construction work on the I-70 Cave Springs Design-Build project will kick into overdrive. Over the next couple months, crews will be working to finish work on the first half of the new Zumbuhl overpass and move traffic onto the new structure. Crews will also be pouring the bridge deck at Cave Springs and constructing the walls at Veterans Memorial Parkway to set the pre-cast Arch structure in place at Cave Springs.

This work will require lane closures. You can stay up-to-date with project lane closures on the [Traffic Impacts page](#) and learn more about the stages of construction on [The Plan page](#) on the [project website](#).

ABOUT THE PROJECT

The I-70 Cave Springs to Fairgrounds Design-Build Project will maximize improvements to address:

- Local Connectivity, Safety, Traffic Congestion
- Long-Lasting Infrastructure with Future Expansion in Mind
- Construction Impacts
- Workforce Diversity

SAFETY SPOTLIGHT

One of the most important things motorists can do is to make sure they leave adequate braking room between your vehicle and the one ahead of you. Don't tailgate! Count out at least two seconds from the time the car ahead of you passes an object and the time your own car passes that object.

If you're the one being tailgated, don't force tailgaters to back off by slamming on your brakes or reducing your speed significantly. This can increase the chances of a collision. When possible, pull over and let them pass.
